**A strong voice for an
innovative and sustainable
energy system**

THE RENEWABLES

What we do

- ✓ We represent industry interests in Berlin, Brussels and globally
- ✓ We connect you to public and private German and EU energy stakeholders
- ✓ We provide public relations services for the renewables industry
- ✓ We identify future trends
- ✓ We commission scientific studies and produce expert statements
- ✓ We host conferences and workshops attended by and for policy and business stakeholders
- ✓ We provide keynote speakers
- ✓ We provide intelligence on German and EU energy markets and policy
- ✓ We bring long term experience in organizational change and performance and lobbying

Our key objectives

- Aligning energy policy with the Paris climate protection goals
- Accelerating the deployment of renewable energy in all sectors
- Introducing CO₂ taxes in the electricity and the heating sector
- Kick-starting the change towards renewable mobility
- Enabling sector coupling and promoting energy storage
- Adapting grids and grid operation for the future
- Developing concepts for an affordable and feasible phase-out of fossil fuels

We believe that our future society will be powered **by a climate friendly, innovative and competitive energy system.**

Our goal is to use 100% renewable energy in electricity, heating/cooling and mobility. This goes hand in hand with technological, economic and legal developments of energy generation, transport and storage as well as new approaches for smart households, businesses and industry. We support **market-based solutions** that provide an **affordable and secure energy supply.**

Making use of this **ample chance to innovate** is an advantage.

In Germany we call it **“Energiewende”.**

German Renewable Energy Federation, Berlin
